## Preliminary List of Sessions and Abstracts

## Table of Content

<b>SESSIONS and PAPERS</b> .....	4
Tying the knot: western and eastern trade ships in the Pacific and Indian Oceans.....	5
Boats and trade .....	9
French scientific and exploration voyages in the Southern Hemisphere: the making of a shared cultural heritage.....	12
New findings in underwater archaeology.....	15
Scientific techniques, use of digital platforms, and application of new technology in maritime archaeology .....	17
Boats in context and the study of early watercraft.....	20
Site management .....	23
Current and future prospects of underwater cultural heritage studies and management in East Asia .	28
Floating forests / submerged forests: an environmental history of trees .....	31
Effective and sustained monitoring of archaeological localities in fresh waters, and <i>in-situ</i> preservation and conservation of underwater cultural heritage.....	35
The archaeology of submerged palaeolandscapes: a global perspective .....	38
Maritime archaeological sites and legacy data, revisiting old shipwrecks with new technologies .....	42
Maritime archaeology, capacity building and training in the developing world .....	45
Presenting maritime and underwater archaeology in museums in the 21st century.....	49
Three-dimensional digitization techniques and technologies in maritime archaeology.....	52
The final frontier: underwater archaeology, new technology development and the deep shipwreck resource.....	56
The geoarchaeology of harbours: current research and future directions .....	59
The social archaeology of ports, harbours and watery places.....	62
Naval warfare / conflict archaeology [TBC].....	65
Cultural landscapes and seascapes [TBC].....	67
<b>SESSION and POSTERS</b> .....	69
Boats and trade .....	70
Scientific techniques and technological applications .....	70
Boats in context: exploring watercraft beyond nautical technology .....	72
Site management .....	73
Current and future prospects of underwater cultural heritage studies and management in East Asia .	74
Floating forests / submerged forests: an environmental history of trees .....	74
The archaeology of submerged palaeolandscapes: a global perspective .....	74

Presenting maritime and underwater archaeology in museums in the 21st century.....	75
Three-dimensional digitization techniques and technologies in maritime archaeology.....	75
The final frontier: underwater archaeology, new technology development and the deep shipwreck resource.....	75
The geoarchaeology of harbours: current research and future directions .....	76
The social archaeology of ports, harbours and watery places.....	77
Cultural landscapes and seascapes .....	78
Early Watercraft—a global perspective of invention and development.....	79
Fresh waters—effective and sustained monitoring of archaeological localities .....	80
Underwater cultural heritage of the Indian Ocean Region .....	82
Finds analysis and conservation.....	82
Underwater archaeology in the Mediterranean.....	82
Traditional sailing.....	83
Art and representation .....	83
